

# Pattern for *Wakiita* (front and rear). (Scaled as described)

Note: The grey zones are only for the overlap. If you are making *wakiita* that are laced to the *tateage*, cut the pattern vertically without the grey overlap. The horizontal grey zone is for rivetting. If you are lacing the *wakiita*, use the lower tab method as in the *munaita* pattern.

The actual dimensions and shape of these plates is dependant on the size of the *dô* less the width of the *tateage*, and the height of the *tateage*.
